S200 WIRELESS

Optical Mouse for Notebooks

Best value for your money, a stylish and user-friendly device ideal for going wireless.

Perfect for everyday use, S200 contains a self-storable USB ultra mini receiver, while a smart power indicator helps to prevent sudden power outages, especially when traveling.

1000dpi precision tracking

Advanced wireless optical sensor technology with 1000dpi tracking resolution for superior performance.

Smart battery power indicator

Indicator light monitors battery level and reminds users when a change is due:
Orange light, blinking slowly = fair battery
Orange light, blinking rapidly = weak battery

Magnetic receiver door

Magnetic feature on the receiver door, so the receiver is securely stored and will not pop or slide out suddenly.

Storable USB ultra mini receiver

"Receiver-inside" design lets the receiver to be stored inside the mouse for convenient storage, and supports automatic power on/off.
